

Preventive Services Guide for Members Other Than Medicare Members

What are preventive services: Preventive services are tests or procedures provided to keep you healthy by looking for health issues or risks in people who don't have any diagnosis, history, or other known risk factors. It's meant to help prevent illness or find problems before any symptoms arise. The Benefit Administration Manual policy for Preventive Services gives more information such as ages, frequency as well as specific codes. Your doctor has access to tools that list the specific codes identified by HAP as preventive services.

What aren't preventive services: Services obtained to evaluate a complaint or symptom; in greater frequency or at different ages than recommended for screening; obtained out of network; or billed with service codes not designated as preventive. Tests used for these purposes are called diagnostic tests.

Product type and Recommendations: Coverage of preventive services for employer and individual products are based on United States Preventive Task Force Recommendations and Affordable Care Act recommendations. Medicare/Senior Plus based products are based on Medicare preventive services and are not addressed by this document. Medicaid/HAP Empowered products are based on USPSTF and ACA recommendations. Some products may not have coverage for "preventive services", please see Member's subscriber documents.

What's a well visit: A well visit is an evaluation scheduled at recommended intervals to check on your health status and point out concerns or risks that might prompt further investigation to maintain optimal health. A well visit is also known as a check-up. Visits to address a complaint such as a stomachache or an earache aren't considered well visits.

NOTE: The below charts reflect very basic information, not every test or service is listed. This document is intended as a guide and doesn't guarantee services. Please see the Benefit Administration Manual policy for the most current coverage information.

Infants, Children and Teens	Member eligibility	Frequency as a preventive service. Additional tests are covered as other medically necessary services.
Well child visits i ncluding but not limited to height, weight, growth & development.	All ages	Frequency follows American Academy of Pediatric recommendations based on child's age.
