

Keep Provider Information Updated in NPPES

It's important to ensure your data in the National Plan & Provider Enumeration System (NPPES) is accurate. The Centers for Medicare & Medicaid Services (CMS) is encouraging health plans to use NPPES as a resource for online provider directories. By using NPPES database for provider directories, we could decrease the frequency we contact you for this information.

To verify your information, log in at the [NPPES website](#). When reviewing, pay close attention to:

- Provider name
- Mailing address
- Telephone and fax numbers
- Specialty
- Taxonomy

Be sure to remove any practice locations no longer in use and only include addresses where:

- You practice
- You actively see patients
- Patients can call and make an appointment
