

## **Coverage for Treatment of COVID Returning to Standard Benefit**

September 2, 2021

At the start of the pandemic, HAP announced it would extend its member cost-sharing waivers for the testing, treatment and telehealth services related to COVID-19 through September 30, 2021. This means members will not be charged any copays, co-insurance or deductibles when being tested or receiving care for an acute diagnosis of COVID-19.

**Beginning October 1, 2021, coverage for the treatment of COVID will return to the standard benefit.**

HAP will continue to waive member cost-sharing for COVID-19 diagnostic tests and test-related visits and the COVID-19 vaccine for all lines of business during the public health emergency according to state and federal guidelines, in accordance with the CARES Act and the Families First Coronavirus Response Act (FFCRA).
