

Diagnosis Requirement for ESRD Facilities

Effective October 1, 2021, end stage renal disease (ESRD) facilities must submit a principal diagnosis of end stage renal disease (ICD-10 code N18.6) for claims submitted with bill type 0720-072Z (clinic-hospital based or independent renal dialysis center) and a condition code of 84 (dialysis for acute kidney injury).

Dialysis for acute kidney injury (AKI) is excluded from this policy.

This affects all HAP and HAP Empowered lines of business.
