

## **Partnership with Home Access Health for In Home Screenings**

HAP is partnering with Home Access Health to provide members with easy-to-use, self-collected lab test kits for the following screenings:

- Colon cancer
- Diabetic nephropathy
- Diabetic HbA1c

Starting in June, Home Access Health will mail an opt-out letter to members who need the above screenings. The member will receive the kits in the mail if they do not opt-out of the program.

The member will complete the test in the convenience of their home and return it to Home Access Health. The results will be shared with the member and their provider.

This program is available for HAP Medicare members, HAP Empowered Medicaid members and HAP Empowered MI Health Link members.
