

## Prior Authorization for Medicaid

Certain treatments and procedures need approval from HAP before you get them. This is called prior authorization.

### **This list does not contain every treatment or procedure that requires prior authorization.**

It's meant to give you an overview. Requirements and coverage vary by plan type. If you have questions, call Customer Service at the number on your ID card.

### **What is prior authorization?**

Prior authorization is an approval from HAP to get a specific covered treatment or procedure. It's needed before you can get certain tests, treatments, medication or supplies. We require prior authorization. We want to make sure you're getting the care you need.

### **How does a prior authorization request work?**

Your doctor submits a prior authorization request based on the suggested treatment. Then, you and your doctor will get a notice of approval or denial

within 14 days. Your request must be approved before you get treatment or services. If you're not approved, you may have to pay for the entire cost of your care.

### **What if my request is denied?**

If your request is denied, you have the right to know why. It can be for many reasons. You can talk to your doctor or call HAP Customer Service at the number on your ID card.

If you have questions about this process, call Customer Service.

**See page 2 for a list of common procedures and treatments that require prior authorization.**

# Procedures and treatments
